MOBIN ROZATI

BACKEND SOFTWARE ENGINEER

Tehran, Iran | +98 912 899 4900 | thisizzmobinrt@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Backend Software Engineer experienced in Python, Django, FastAPI, Go, and database-backed applications. Skilled in event-driven design, concurrency, relational database optimization, and reliable backend services, with additional experience integrating LLMs, MCP tools, and applied machine learning.

TECHNICAL SKILLS

Languages: Python, Go, Java, SQL, C
Backend & Data: Django, Django REST Framework, FastAPI, REST APIs, Celery, WebSockets, PostgreSQL, MySQL, Redis, MongoDB
Architecture & Quality: Event-driven systems, Microservices, DDD, Clean Architecture, SOLID, Concurrency, Unit & Integration Testing
AI & Tools: LLM Integration, MCP, RAG, LangChain, LangGraph, PyTorch, OpenCV, Git, Docker, Linux

PROFESSIONAL EXPERIENCE

Backend Software Engineer | Cryptocurrency Trading Simulation Platform Feb 2026 - Jul 2026

- Refactored a Django-based trading engine to address concurrency bottlenecks, database hot paths, and Redis coupling.
- Designed account-sharded, event-driven processing with idempotency, replay, and crash recovery; developed migration and compatibility tests for trading workflows.

AI Software Engineering Intern | FAVA Jul 2025 - Sep 2025

- Built a FastMCP server integration connecting LLMs with external APIs and RAG tools to support context-aware backend workflows.

Backend Software Engineer | Hozhan Company Jun 2024 - Mar 2025

- Optimized B2B backend services and PostgreSQL/MySQL data access while maintaining compatibility with legacy clients; supported API integration and Docker deployments.

SELECTED PROJECTS

URL Shortener
Go, PostgreSQL, Docker
Concurrency-safe URL shortening API with idempotent creation, pluggable storage, and 92.9% statement coverage.

Document Scanning & Enhancement
Python, PyTorch, OpenCV
CNN-based document localization and enhancement; 29.35 dB PSNR, 0.934 SSIM, and 173 automated tests.

High-Performance CSV Data Pipeline
Java, MySQL
Memory-efficient streaming parser with configurable schema mapping and transactional error validation.

AI-Powered Web App (Mini GPT)
Python, FastAPI, Hugging Face
Integrated open-source language models with asynchronous APIs for interactive responses.

University Management System
FastAPI, Clean Architecture
Modular university management backend using DDD and Clean Architecture principles.

Divar Platform Simulation
Java, OOP
Classified-ads application simulation focused on object-oriented design and data parsing.

EDUCATION

B.Sc. Computer Engineering | K.N. Toosi University of Technology (KNTU) | Sep 2022 - Present
Research focus: Deep Reinforcement Learning (DRL) and Digital Twins for Vehicular Edge Computing.

CERTIFICATIONS

- AI Engineer for Developers Associate - DataCamp
- Model Context Protocol (MCP) Course - Hugging Face (Aug 2025)
